Ten new ships by end of 2027

10 New U.S. Ships in 3 Years: American Announces More Newbuilds and *American Legend* Sea Trials

GUILFORD, CT — November 1, 2024 — American Cruise Lines is pleased to announce that it has signed contracts with Chesapeake Shipbuilding for 4 more new ships, bringing the Line's total of 25 ships with Chesapeake to 10 ships over the next 3 years. All the newbuilds are expressly for the U.S. cruise market; the fastest growing segment of the river cruise industry. American Cruise Lines has been a trailblazer in that market for more than 50 years and will operate 21 small ships around the country next year.

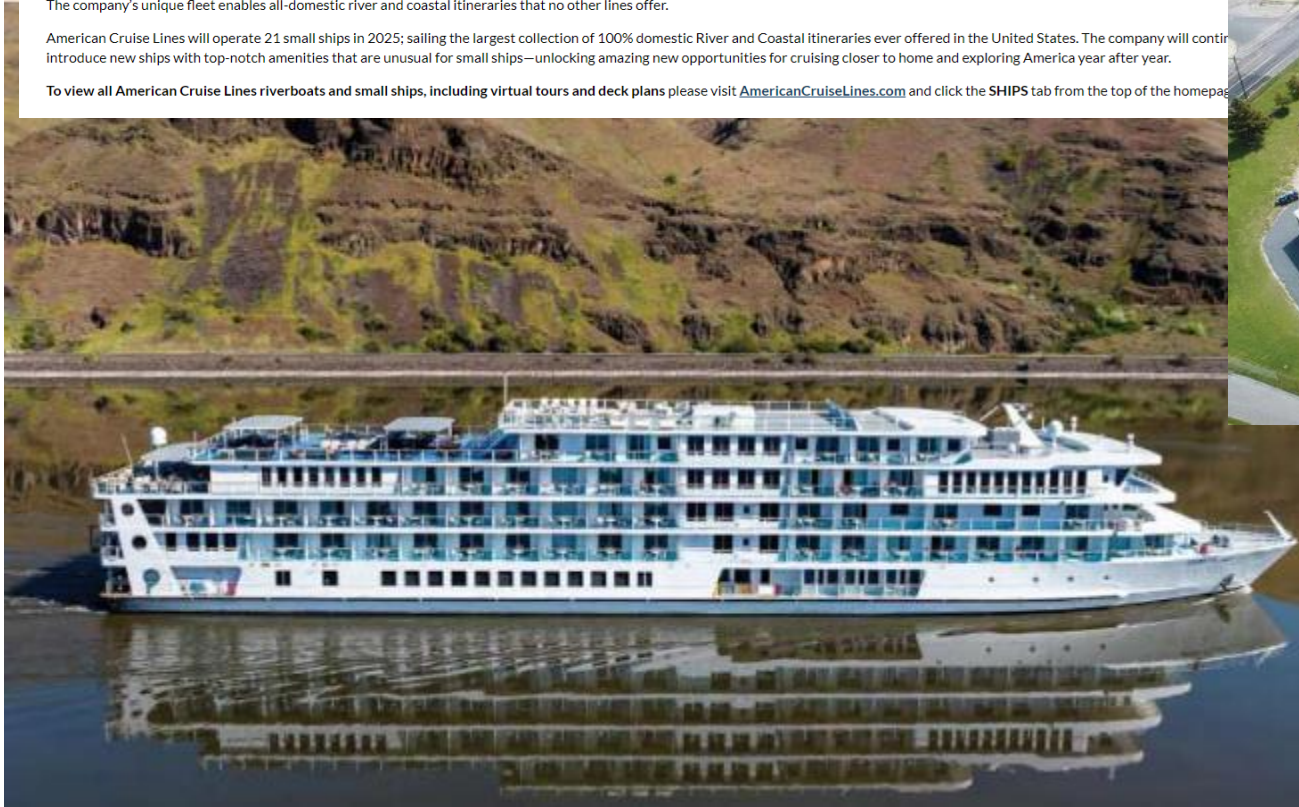

The 10 new ships from Chesapeake begin with the delivery of *American Legend* this week. The newest *Coastal Cat* in American's fleet passed sea trials and is on schedule for its first cruise on November 25th. The remaining newbuilds on order will roll out every few months over the next 3 years. They include 3 riverboats and 6 additional coastal ships. Now available for booking are: *American Pioneer* (2025); *American Maverick* and *American Ranger* (2026), and new riverboat *American Encore* (2026). More details on the 4 additional newbuilds for 2027 will be released soon.

American's commitment to U.S. River cruising is longstanding, but the rapid expansion of the company's fleet in just the past several years is demonstrative of the growing interest and demand for small ship class cruise experiences in the United States. American has introduced 19 of the 24 cruise ships built in the U.S. in the past 20 years.

The company operates the only 100% U.S. flagged fleet of riverboats and small ships in the world and remains fully committed to introducing only new small ships built specifically for domestic U.S. waters. The company's unique fleet enables all-domestic river and coastal itineraries that no other lines offer.

American Cruise Lines will operate 21 small ships in 2025; sailing the largest collection of 100% domestic River and Coastal itineraries ever offered in the United States. The company will continue to introduce new ships with top-notch amenities that are unusual for small ships—unlocking amazing new opportunities for cruising closer to home and exploring America year after year.

To view all American Cruise Lines riverboats and small ships, including virtual tours and deck plans please visit AmericanCruiseLines.com and click the SHIPS tab from the top of the homepage.

ENVIRONMENTAL STANDARDS

EMISSIONS CONTROL: Tier 4 emissions compliant

FUEL: only ultra low sulfur diesel

COLD IRONING: shore power ready

ADVANCED WASTEWATER TREATMENT SYSTEMS

LOCALLY SOURCED & SUSTAINABLE CUISINE

SINGLE USE PLASTICS REDUCTION/ELIMINATION

ROUTE OPTIMIZATION: mileage reduction and speed restrictions greatly reduce fuel consumption

ADVANCED NOISE & VIBRATION: limits atmospheric and underwater noise transmission

HULL: Hull forms prioritize shallow draft to limit bottom disturbance

OVERTOURISM: committed to keep ships small

Investing in Infrastructure

- New cruise dock in Kalama
- New piles/fenders in Astoria
- New piles/fenders in Richland
- New cruise dock in Lewiston

Goal: ensure safe, reliable operations

Economic Impact

- Shore excursion providers
- Local loop: restaurants, shops, other local businesses
- Hotels
- Food, alcohol, and consumable supply vendors
- Fuel and maintenance companies
- Airports

Guest Speaker Program

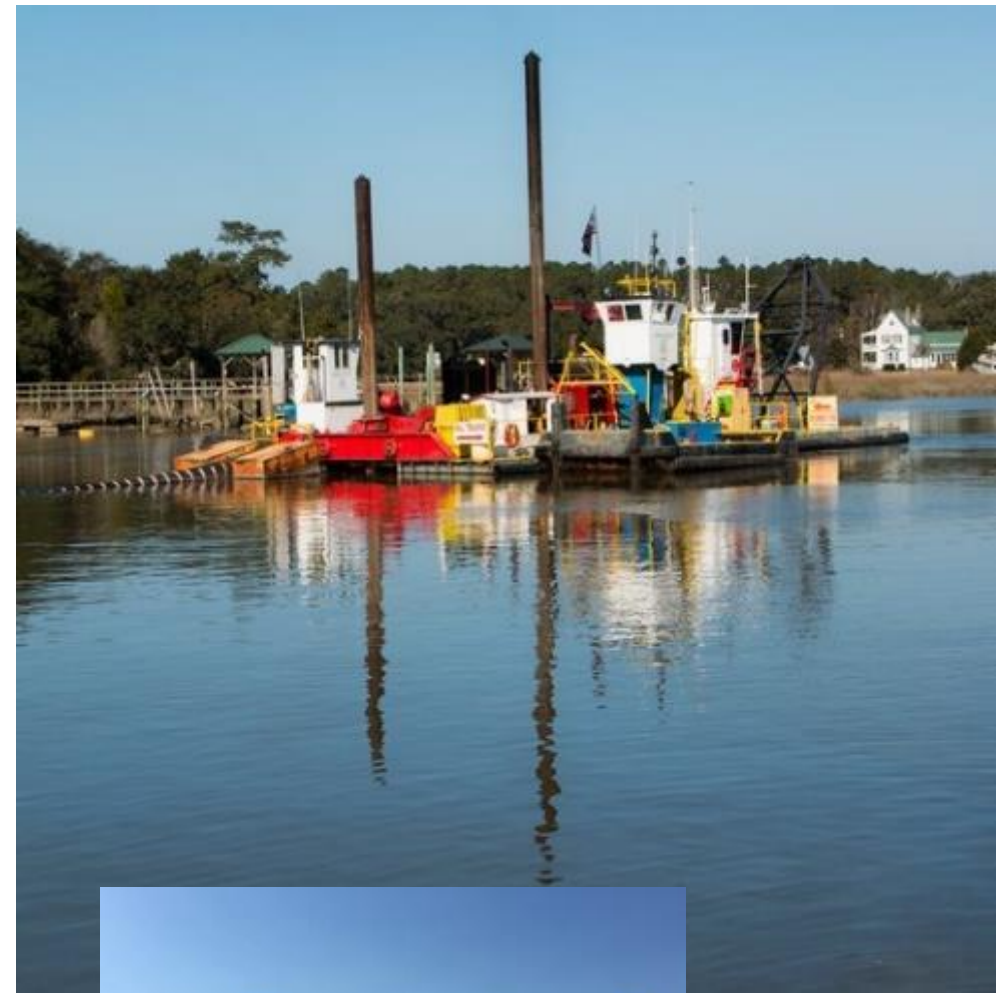

- Robust guest speaker program of onboard experts
- We take pride in telling the story of our ports and waterways
- We highlight our working waterfronts and port infrastructure
- Result – our guests go home as waterway and port ambassadors

Navigation Support

- Our nation's federal waterways and related infrastructure are assets that grow in importance each year
- Dredging, surveys and lock maintenance are critical
- Partnerships with USACE, MARAD, USCG, NOAA
